Result-driven Django Developer specializing in Django and Django REST Framework, with expertise in system design, API development, and scalable architectures. Skilled in building robust backend systems, RESTful services, admin dashboards, and AI-powered automation workflows. Committed to clean code, performance optimization, and delivering production-ready applications in fast-paced, agile environments.

PROFESSIONAL EXPERIENCE

Freelance Web Developer| (Django/Laravel/Wordpress) (2024 - Present)

- Delivered full-stack web applications and REST APIs for small businesses.

- Developed custom backend solutions using Django and Django REST Framework, focusing on authentication, CRUD operations, and deployment.

- Collaborated directly with clients to gather requirements, plan features, and write clean, scalable code.

- Integrated 3rd-party services such as email systems, Google Maps API, and file uploads.

Business System Analyst Trainee | Dulles Global Investment (2024 - 2025)

- Contributed in the development of 6 web-based Client Management Systems and investment tracking tools in collaboration with third-party developers, enhancing operational capabilities.

- Conducted system gap analysis and automated process mapping under the guidance of senior PMs.

- Developed & Documented Software Requirement Specifications (SRS) for various businesses.

Projects

- **ImaGEN AI Image Generator [Live Link]:** Created a full-stack AI-powered image generation platform using Django REST Framework and React, integrated with Pollination AI for automated image creation.

- **Freelance Marketplace API (Django + DRF)**: Built a role-based backend system with JWT auth, service listings, reviews, and a freelancer directory using DRF viewsets and modular serializers.

- **Green Bangla Foundation [Live Link]**: Integrated a module for Tender Procurement, reducing manual processing by 70% and enabling real-time status tracking for admins.

EDUCATION

Bachelor of Science in Computer Science and Engineering (2022-2026)

BRAC University
